

EFI™ Jetrion® technology + Spinnaker pressure sensitive

THE SKY'S THE LIMIT!

efi®

EFI Jetrion 4900

Spinnaker has an extensive line of EFI Jetrion approved facestocks.

The convenience and flexibility of digital printing has increased the popularity of the technology. EFI™ Jetrion® brand UV ink jet presses can print on many of our standard pressure sensitive products without requiring a special top coating, making material sourcing easy. Their system is ideal for short runs, offering quick set-up with minimal waste and no plate production. EFI Jetrion UV ink jet inks provide durable printed images and color consistency from run-to-run, including realistic skin tones.

With a variety of prime and variable paper and film options available Trimless, finding the construction you need is simple, including semi gloss, cover-ups, tamper-evident void, holographic rainbow polyester, and metallized options with all temp, cold temp, and removable adhesives.

Printable Liners

In addition to facestocks, Spinnaker has also received approval on 40# SCK and 50# SCK liners for one and two color backside printing. Liner printing is ideal for displaying a company's name, logo, or basic text.

Short-run digital label printing is efficient and easy. We're here to make pressure sensitive material sourcing easy, too.
