

# 2.6 mil White Pearlized BOPP

This is a white, topcoated, multi-layer polypropylene film that offers great performance and excellent printability across many primary and secondary printing technologies. Despite its high performance properties, this product serves well as an economically priced alternative to other white polypropylene products in the market.

## Print types:

- Flexo
- Screen
- Gravure
- Cold Foil
- UV Inkjet (approved with Domino, Durst, Epson, and Jetrion)
- Toner Based (approved with Konica, Mark Andy, and Xeikon)
- Thermal Transfer (approved for use with resin and some wax/resin ribbons. See our thermal transfer matrix for more details)

## Applications include:

- food & beverage
- health & beauty
- retail
- durable labels
- household & detergents
